Concordia's Colleges: Why you should know about them

Concordia's innovative small "Colleges" are arousing a great deal of interest among able, serious, and intellectually curious students. Our Colleges enable us to provide a more integrated approach to university education, by grouping together faculty and students with a shared philosophy of education.

Our colleges also emphasize a personal atmosphere, in which students work closely with College Fellows and benefit from stimulating exchanges and individual guidance. Concordia's Colleges, with their special curricula and dedicated students and faculty, are proving to be one of the most exciting responses to the needs of university education in Montreal and across Canada.

If you want to find out about the various "colleges" at Concordia, representatives will be visiting your campus on the date listed opposite.
